1996

Journal of Cardiopulmonary Rehabilitation Subject Index

Abstracts, 68, 130, 197, 258, 419
Age, changes in exercise capacity following cardiac rehabilitation and, 38
Airflow limitation, chronic, effect of wheeled walking aid on, 63
American Association of Cardiovascular and Pulmonary Rehabilitation Eleventh Annual Meeting, 280
American College of Sports Medicine, exercise specialist, 353
Anaerobic threshold, blood lactate and, 227
Ankle-brachial index, 47
Arm ergometry, oxygen consumption in coronary artery disease and, 394
Arm exercise, responses in patients with compensated heart failure, 366
Asthma, diagnosis of, vocal cord dysfunction and, 91
Atrial fibrillation, chronic, exercise training and, 193

Blood pressure, systolic, total body strength training and, 56
Book Reviews, 72, 134, 202, 262
Breathlessness, in COPD, effect of wheeled walking aid on, 63

Cardiac disease, patients hospitalized with, predictors of subsequent medical care among, 109
Cardiac patients, exercise complications in, 9
Cardiac rehabilitation
  changes in exercise capacity following, 38
  changes in health-care delivery and, 151
  cholesterol awareness and, 117
  in coronary artery disease, effect of hemoglobin on oxygen uptake, 251
  after heart surgery, 413
  after myocardial infarction
    early strength training and, 100
    peak oxygen uptake and skeletal metabolism and, 169
  supervised exercise and ECG monitoring during, 233
  use of telephone in, 349
  use of walking poles in, 245
Cardiac rehabilitation programs
  gender and, 402
  gender preferences for, 163
  monitoring and supervision of, guidelines for, 9
  women's views of, 123
Cardiopulmonary cycle ergometer stress test, submaximal, results in older adults, 93
Cardiopulmonary exercise testing (CPEX), clinical applications of, 357
Cardiopulmonary illness, chronic, exercise capacity in, timed walking tests of, 25
Cardiopulmonary rehabilitation, internships in, 87
Cardiopulmonary rehabilitation programs
  home-care, 386
  Pennsylvania, New Jersey, and Delaware regional survey of, 175
Cardiovascular disease, rehospitalization of patients with, 109
Cardiovascular medicine, future of, 219
Cholesterol awareness, in patients with coronary artery disease, 117
Chronic obstructive pulmonary disease (COPD)
  disability, oxygenation, and breathlessness in, effect of wheeled walking aid on, 63
  home-care rehabilitation program and, 386
Claudication pain, peripheral vascular occlusive disease and, 47
Cookbooks, "heart healthy", 217
COPD. See Chronic obstructive pulmonary disease
Coronary artery bypass graft surgery, hemoglobin-hematocrit levels and, 251
Coronary artery disease
  cholesterol awareness in patients with, 117
  effect of exercise on ventilatory threshold in, 227
  effect of hemoglobin on oxygen uptake in, 251
  estimating oxygen consumption during treadmill and arm ergometry activity in, 394
  low physical activity and, 378
  safety and effectiveness of walking poles and, 245
Coronary heart disease, risk factors for, effects of 2000 kcal per week of exercise and, 183
CPEX. See Cardiopulmonary exercise testing
Cycle ergometry, exercise stress testing and, 93

Depression, rehospitalization of patients with cardiac disease and, 109
Disability, in COPD, effect of wheeled walking aid on, 63

ECG monitoring, in cardiac rehabilitation, 9
Editorials, 9
Electrocardiographic monitoring, cardiac rehabilitation and, 233
Energy expenditure, during exercise in obese women, 239
Exercise
  effect on ventilatory threshold in men with coronary artery disease, 227
  supervised, cardiac rehabilitation and, 233
Exercise capacity
  changes following cardiac rehabilitation, 38
  timed walking tests of, 25

Exercise conditioning services, delivery of, 175
Exercise prescription, 34
Exercise specialist, American College of Sports Medicine, 353
Exercise therapy, Pennsylvania, New Jersey, and Delaware regional survey of, 175
Exercise tolerance, compensated heart failure and, 366
Exercise tolerance test, results in older adults, 93
Exercise training
  patients with chronic atrial fibrillation and, 193
  patients with intermittent claudication and, 47
  risks of, 9

Focus groups, cardiac rehabilitation programs and, 123

Gender
  cardiac rehabilitation programs and, 163, 402
  changes in exercise capacity following cardiac rehabilitation and, 38
Geriatrics, exercise stress testing and, 93

Habituation, exercise stress testing and, 93
Health care costs
  reasons for increases in, 151
  rehospitalization of patients with cardiac disease and, 109
Health-care delivery, changes in, cardiac rehabilitation and, 151
Heart failure, compensated, arm exercise and, 366
Heart rate
  total body strength training and, 56
  treadmill testing and, 160
Heart surgery, cardiac rehabilitation after, 413
Hemoglobin, oxygen uptake in coronary artery disease and, 251
Home-Care Rehabilitation Program (HCRP), chronic obstructive pulmonary disease and, 386

Letters to Editor, 136, 427
Literature Update, 68, 130, 197, 258, 419

Medical care, rehospitalization of patients with cardiac disease and, 109
Myocardial infarction
  recovery after, perceived overprotectiveness and, 372
  rehabilitation after, peak oxygen uptake and skeletal muscle metabolism and, 169
  strength training early after, 100

National Cholesterol Education Program (NCEP), 117
NCEP. See National Cholesterol Education Program
New Products and Services, 74, 138, 205, 266, 432
Nutrition, 217

Obesity, oxygen uptake and energy expenditure during exercise and, 239
Overprotectiveness, recovery after myocardial infarction and, 372
Oxygenation, in COPD, effect of wheeled walking aid on, 63
Oxygen consumption, in coronary artery disease, treadmill and arm ergometry activity and, 394
Oxygen intake, exercise training in chronic atrial fibrillation and, 193
Oxygen uptake
  in coronary artery disease
    effect of exercise on, 227
    effect of hemoglobin on, 251
  during exercise in obese women, 239
  physical activity and coronary risk factors in middle-aged Japanese and, 378
  skeletal muscle metabolism and, rehabilitation after myocardial infarction and, 169
  treadmill testing and, 160

Peripheral vascular occlusive disease (POVD), claudication pain and, 47
Physical activity, coronary artery disease and, 378
Physical fitness, effects of 2000 kcal per week of exercise on, 183
Pulmonary rehabilitation, use of telephone in, 349
Pulmonary rehabilitation programs, Pennsylvania, New Jersey, and Delaware regional survey of, 175

Rate pressure product (RPP), total body strength training and, 56
RPP. See Rate pressure product

Safety
  strength training early after myocardial infarction and, 100
  use of walking poles by patients with coronary artery disease and, 245
Skeletal muscle metabolism, oxygen uptake and, rehabilitation after myocardial infarction and, 169
Stair climbing, effects on physical fitness and risk factors for coronary heart disease, 183
StairMaster exercise training, patients with intermittent claudication and, 47
Strength training
  cardiovascular responses during submaximal walk and, 56
  early after myocardial infarction, 100
Stress test, results in older adults, 93

Telephone, cardiac and pulmonary rehabilitation and, 349
Training Level Comparison (TLC) Trial, 227
Treadmill activity, oxygen consumption in coronary artery disease and, 394
Treadmill exercise training, patients with intermittent claudication and, 47
Treadmill test heart rate/oxygen uptake regressions, selecting training workloads using, 160

Ventilatory threshold, in coronary artery disease, effect of exercise on, 227
Vocal cord dysfunction (VCD), 91

Walking, effects on physical fitness and risk factors for coronary heart disease, 183
Walking aids, patients with chronic airflow limitation and, 63
Walking poles, safety and effectiveness of, patients with coronary artery disease and, 245
Women
  cardiac rehabilitation programs and, 123
  obese, oxygen uptake and energy expenditure during exercise in, 239
Work rate, exercise training in chronic atrial fibrillation and, 193
